

Hackathon Problem Statement

Today, schools face a wide range of challenges that directly affect **student success** and **community trust**:

- Student dropouts happen unexpectedly, leaving educators struggling to improve retention.
- Parents and stakeholders demand greater transparency in how school funds are used.
- School transport systems need better safety and accountability measures.
- Students preparing for exams need more personalized and effective revision tools.
- Many learners also struggle to connect with peers or mentors for extra academic support.

Your Challenge:

How can we build a **digital platform** that tackles these pressing issues and reimagines the school experience?

The more problems your solution captures and addresses effectively, the stronger your chances of winning. Each team is free to approach the challenge in its own unique way design, build, and present the platform you believe best empowers students, supports educators, and builds trust with the wider school community.
